

## What is it?

Aside from RNG, each unit has its own weight value that dictates how much damage it would absorb from other units stacked together. This tactic of mixing units is to prevent the unit's death in scenarios where you are expecting high resistance but it will sacrifice overall damage of your. (and maybe other aspects such as speed). Another use case is to be able to operate low damage unit's for longer.

Example; A stack with 1 ASF and 4 Strike Fighter.

|        |        |                   |
|--------|--------|-------------------|
| Unit   | 1x ASF | 4x Strike Fighter |
| Weight | 1 x 10 | 4 x 6             |
|        | .....  | .....             |
|        | 10     | 24                |

Now incoming damage will be segmented into 34 parts, 10 go to ASF and 24 go to Strike Fighter

|        |                  |                   |
|--------|------------------|-------------------|
| Unit   | 1x ASF           | 4x Strike Fighter |
| Damage | 100% x (10 / 34) | 100% x (24 / 34)  |
|        | .....            | .....             |
|        | 29.41%           | 70.59%            |

So in theory; ASF in this stack will take 29.41%, and 4 SF will take 70.59% of incoming damage.

For stack with different armor types of units, reading for more [complex damage's calculation can be found here.](#)

## Ground units

**i** Note that a stand alone unit such as missiles is pointless to know the weight, same goes to transport truck & grounded aircraft since they can only stack with themselves so they will always have the same weight.

| Infantry            |        | Armored                   |        |
|---------------------|--------|---------------------------|--------|
| Unit                | Weight | Unit                      | Weight |
| Mot Infantry        | 3      | Combat Recon Vehicle      | 2      |
| Mechanized Infantry | 7      | Armor Fighting Vehicle    | 7      |
| Marine Infantry     | 5      | Amphibious Combat Vehicle | 6      |
| Airborne Infantry   | 5      | Main Battle Tank          | 9      |
| Special Forces      | 1      | Tank Destroyer            | 8      |
| National Guard      | 4      | Support                   |        |

|                      |     |                          |   |
|----------------------|-----|--------------------------|---|
| Mercenaries          | 10  | Towed Artillery          | 2 |
| <b>Officers</b>      |     | Mobile Artillery         | 6 |
| Infantry Officer     | 2   | Multiple Rocket Launcher | 6 |
| Airborne Officer     | 1   | Mobile AA                | 4 |
| Tank Officer         | 5   | SAM                      | 3 |

## Change log

Discovered May 13th 2024; Strike Fighters' weight change from 6 to 5  
Patch 2312.05 (Dec 5th 2023); Large format change and many adjusted value  
Patch 2210.05 (Oct 5th 2022); Elite Strike Fighter from 1.00 to 8.00
