

Full Damage Calculation

i Disclaimer: Mostly deducted guess work, not verified by official.

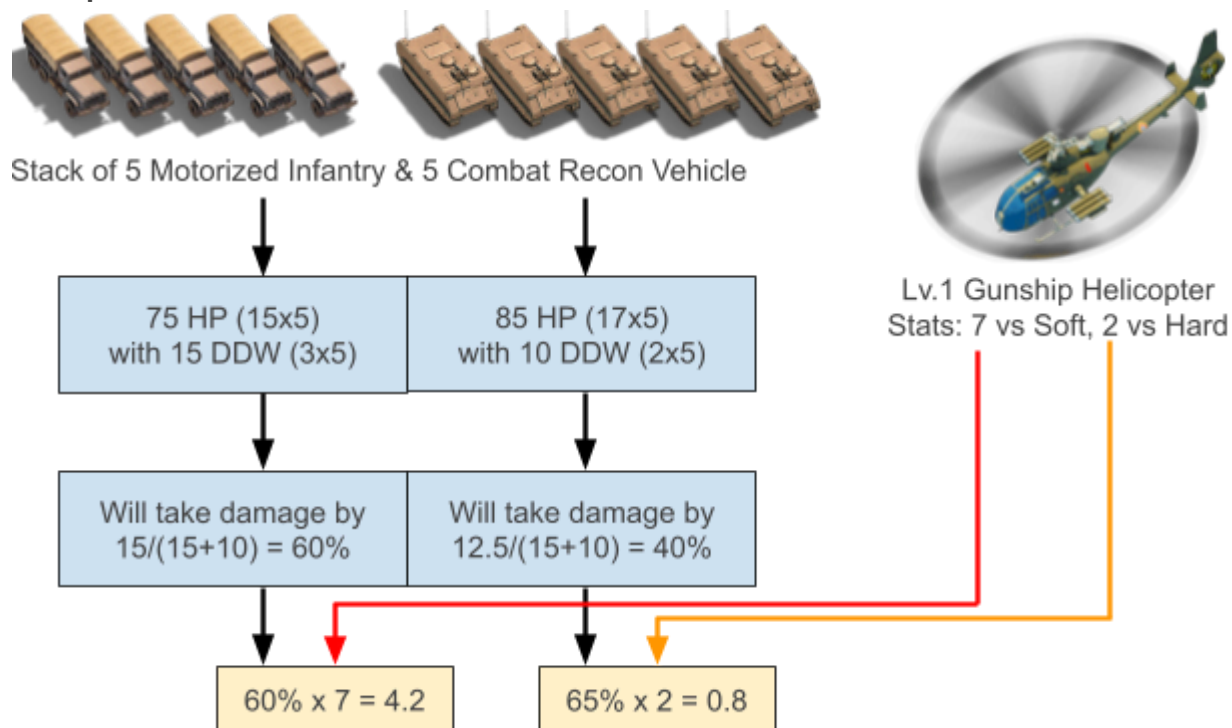

Simple situation

step by step

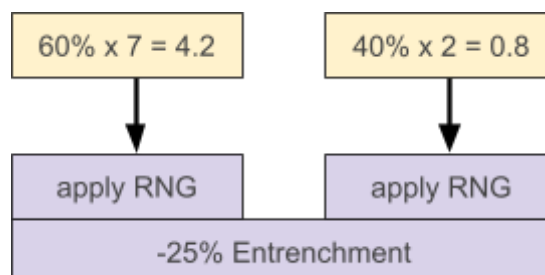

1. damage distribution
2. convert damage% to appropriate damage to armor type
3. applying rng and other factor

for some units with anti bunker, believed to have separate calculations

Example

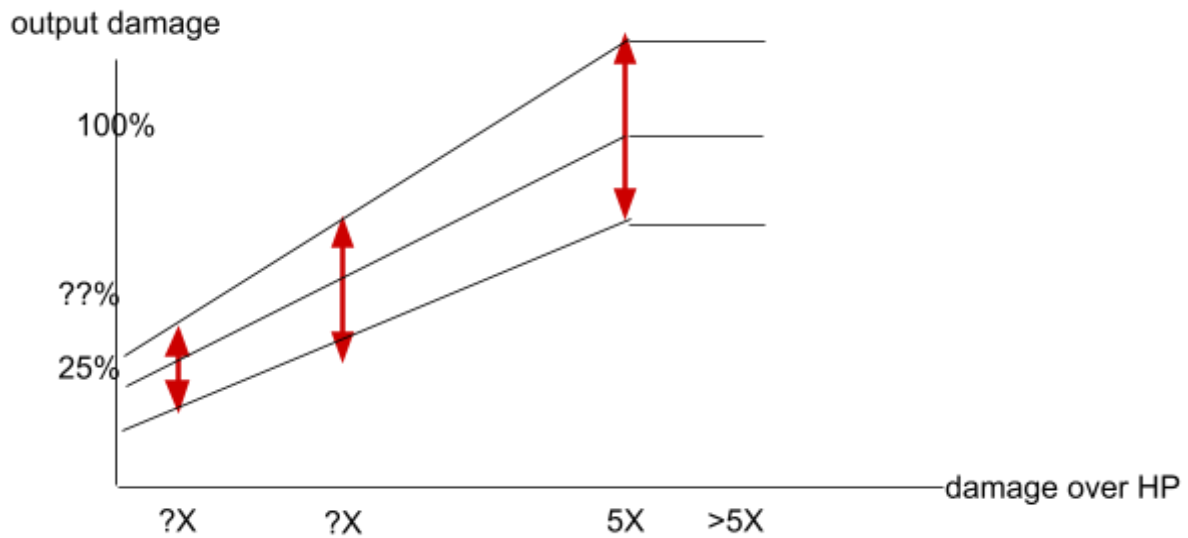

From the example you can see how a mixed stack will diluted the damage of gunship, resulting in very low damage dealt to the ground stack. (total of 5 damage out of 7 soft / 2 hard stats) and the next step is RNG (separately) and other factors such as entrenchment if do has.

RNG and Overkill speculation

Currently it is unknown that stack's strength or stack's supposed damage is used to determine the calculation of overkill mechanic. stack strength or stack's supposed damage?

- How much factor (times) it needed over HP to not be influenced by overkill
- How overkill to work intermittently? Is it linear or something else?
- RNG base is 80-120%? waiting for verification
- In what step does the overkill take place?

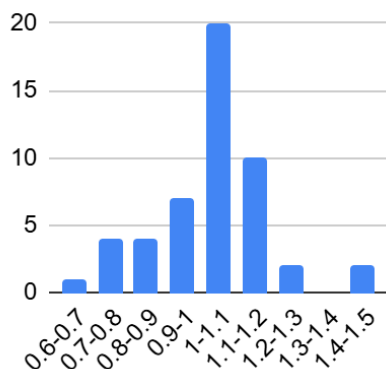

Following conclusion is result from RNG's tests after Patch 2502-19 (Tested in Beta match)

① F factor is representing Damage over Target's HP

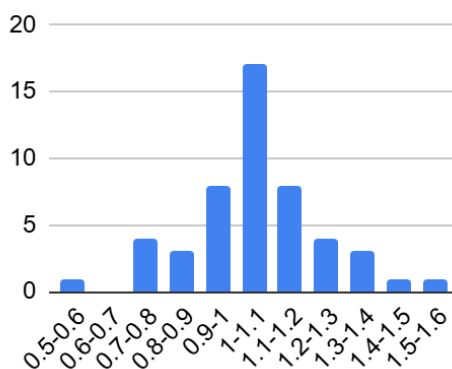

in summary

- You can expect 50% to 150% RNG range if you can not one shot enemy (Test #1-4)
- RNG get tighter to 100% when your damage over HP is going up (Test #1-4)
- around F 1.12 is a breakpoint where overkill kicked, resulted in abysmal RNG roll (Test #7)
- Above F 1.4 you have 98% chance to kill enemy, and 100% at above 1.75 (Test #5-6)

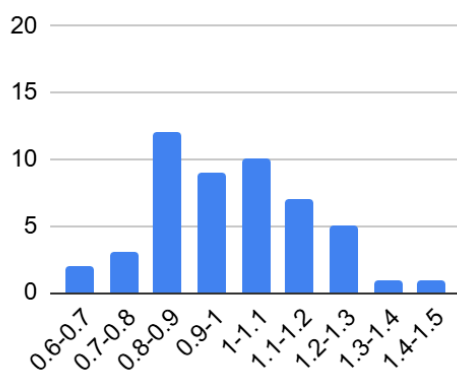

Test #1 F=0.46

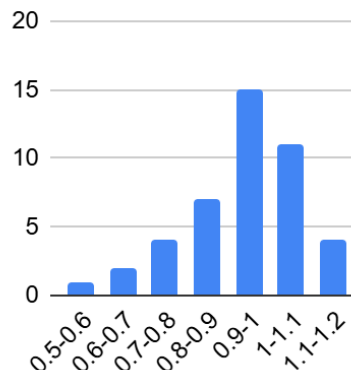

Test #2 F=0.28

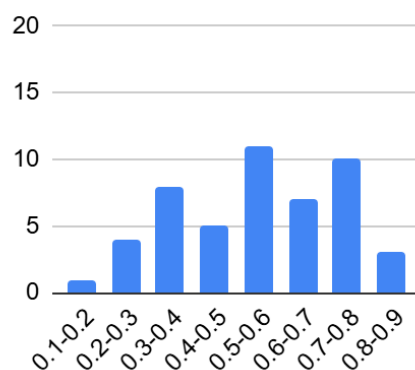

Test #3 F=0.175

Test #4 F=0.875

Test #7 F=1.12

Test descriptive:

Test	Damage	HP	F	Details
1	7	15	0.47	lv1 Mobile radar vs lv1 atk heli both are eastern
2	7	25	0.28	lv1 tank destroyer vs lv1 atk heli both are eastern
3	3.5	20	0.18	lv 1 western MAA vs lv 1 eastern Atk heli in -25% overkill beta test. atk heli has 7 attack
4	17.5	20	0.88	5 lv 1 western MAA vs lv 1 eastern Atk heli in -25% overkill beta test. atk heli has 7 attack
5	35	20	1.75	10 lv1 western MAA vs lv1 eastern Atk heli
6	21	15	1.40	3 lv eastern atk heli vs lv1 eastern mobile radar
7	28	25	1.12	3 lv eastern atk heli vs lv1 eastern mobile radar

Noted:

- Every test included 50 samples.

- In test #5 all units are dead.
- In test #6 only 1 unit survived.

Update

- [You can find the full patch note here](#)
- Patch 2502-19 (19 Feb 2025) introduced a significant adjustment to Overkill mechanic.
